Investment objective

The fund Assenagon Credit Selection ESG invests in corporate bonds as well as in credit derivatives and targets the generation of continuous and sustainable returns using a combination of credit risk premium, interest rate and price gains.

Investment strategy

In order to achieve its investment objective, portfolio management selects issuers that offer an attractive ratio of credit risk premium to default probability in a multi-step investment process. Central to the investment thesis, environmental, social and corporate governance aspects are taken into account throughout the process and help to achieve clearly defined sustainability objectives. A minimum credit rating of B-/B3 from Standard & Poor's or Moody's or a comparable rating is required. The investment focus of the Assenagon Credit Selection ESG is on European and North American issuers, concentrated on corporate bonds in the crossover segment between investment grade and high yield, where benchmark-independent investors can achieve excess returns. Due to the high flexibility in the choice of instruments (bonds denominated in EUR or multi-currency, CDS), an outperformance compared to outright bond investments can be achieved. In addition, the portfolio is largely hedged against currency risks. The fund is actively managed and is not linked to a benchmark.

* Issuer ratings based on those from established external rating agencies such as S&P are applied; if a bond has no external rating it will be rated by the management company. In the case of multiple ratings, the second best rating is used. Available liquidity will be rated based on the respective custodian rating.

Assenagon Credit Selection ESG

Rewards	Risks
• Possibility of additional return through individual value analysis and active fund management. • Diversification across numerous individual securities. • Participation in current interest on bonds, upside potential if interest rates decrease. • Prospect of positive impact on the environment through the use of a sustainable strategy.	• No guarantee of success for individual security analysis and active fund management. • Possibly less participation in the development of individual securities. • Risk of possible bond price losses in the event of interest rates increasing. • Positive environmental impact not guaranteed by the sustainable strategy. This approach reduces the investment universe.

With regards to LSEG Lipper, the following applies:

The LSEG Lipper Fund Awards, granted annually, highlight funds and fund companies that have excelled in delivering consistently strong risk-adjusted performance relative to their peers.

The LSEG Lipper Fund Awards are based on the Lipper Leader for Consistent Return rating, which is an objective, quantitative, risk-adjusted performance measure calculated over 36, 60 and 120 months. The fund with the highest Lipper Leader for Consistent Return (Effective Return) value in each eligible classification wins the LSEG Lipper Fund Award. For more information, see lipperfundawards.com. Although LSEG Lipper makes reasonable efforts to ensure the accuracy and reliability of the data used to calculate the awards, their accuracy is not guaranteed.
