Internship

in Munich

m/f

Product Management (Structuring)

Assenagon is an asset manager specialising in the management of capital market risks. The company offers comprehensive management of risks in the form of funds, and focuses on investors' needs to generate returns within prescribed risk budgets. It also offers tailor-made services, which cover the whole risk management process chain – from evaluating risks, to analysing risk/return profiles, identifying and seizing investment opportunities on regulated markets and collateral management.

Our company currently employs around 80 staff at its locations in Luxembourg, Munich, Frankfurt and Zurich. We regularly offer exciting internships for students, graduates and ambitious young professionals. Seize the opportunity to gain insights into a dynamic company and put your abilities to the test for at least twelve weeks.

If you have a background in economics and top grades and are looking for an interesting internship in fund structuring as part of your degree, we look forward to receiving your application.

YOUR RESPONSIBILITIES AND TRAINING AREA

- Contributing to multiple aspects surrounding the creation of new financial instruments or fund products. You will work with all relevant departments (e.g. Portfolio Management, Financial Engineering, Risk Management and Sales) to realise innovative investment solutions for our clients
- Supporting fund mandates for well-known investment banks and asset managers
 - Researching customer enquiries
 - Processing requests for proposals and due diligence queries
 - Working on project management and reporting processes
- In-house consulting on new regulatory requirements
 - Identifying the main provisions on own initiative
 - Analysis of the effects on fund performance, processes and contracts with the respective teams
 - Presentation of results and support for implementation actions

YOUR PROFILE

- Advanced stage in a business- or economics-related degree course (business, economics, business law, business engineering or business IT, financial mathematics or related course of study)
- Keen perception, high quality standards, excellent grades
- Extremely reliable working habits and independent analysis of complex interrelations
- Exceptional team and communication skills
- Interest in the design of asset management products and processes
- Very good Microsoft Office skills Excel, Word, PowerPoint)
- Experience in the financial services industry or consultancy an advantage
- Knowledge of investment regulatory/tax law, banking regulation, Solvency II or project and process management an advantage

You additionally have the opportunity to write your thesis in our company.
